DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Yang et al. (WO 02/37500 A1).

Yang et al. teach a bistable electrical device that may be used to form a memory device wherein a memory input element is provided for applying voltage to the bistable body (paragraph 0011). The bistable device comprise a first electrode, a second electrode, and a bistable body between the two electrodes (Figure 1 and paragraph 0030). The bistable body comprises a low conductivity material (paragraph 0033). The low conductivity material may be 2-amino-4,5-imidazoledicarbonitrile (paragraph 0037), which reads on the compound I of the instant claims wherein $R_1 = -NH_2$ and $R_2 = R_3 = -CN$. One of the electrodes is formed by deposition of the electrode material onto a substrate (paragraph 0045). The memory input element or control unit reads on the limiter of instant claims 4 and 5.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-5 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6-8, and 15-18 of copending Application No. 10/803,456. Although the conflicting claims are not identical, they are not patentably distinct from each other because the inventions of instant claims 1-5 represent a genus of which the inventions described by claims 6-8, and 15-18 of copending Application No. 10/803,456 are species. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993). The element of the instant claims is written with open language and requires an organic thin film comprising compound I between two electrodes. The element of copending Application No. 10/803,456 also contains an organic thin film comprising compound I between two electrodes and additionally a second organic thin film having a different electrical conductivity from the first organic thin film. Because the instant claims are written with open language, the instant element is open to the inclusion of any other constituents including an additional organic thin film having a different conductivity from the first organic thin film. That

Art Unit: 1773

is, the invention of the instant claims is a genus of which the invention of claims 6-8, and 15-18 of copending Application No. 10/803,456 are species.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
